2. WARRANTY CONDITIONS

The warranties set forth above are subject to the following conditions:

- 2.1 The fan must be installed by either a Swifter Fans factory technician or a properly licensed electrician/contractor as required by applicable state, county, or municipal regulations.
- 2.2 The fan must be installed in a non-residential facility. For purposes of this warranty, 'non-residential facility' means any building or structure that is not primarily used as a private dwelling, including but not limited to: commercial buildings, industrial facilities, warehouses, retail establishments, offices, schools, hospitals, agricultural buildings, and mixed-use buildings where the fan is installed in a commercial area. Home-based businesses operating in residential buildings are considered residential facilities.
- 2.3 The fan cannot be relocated from its original installed location.
- 2.4 The fan must be installed, operated, and maintained in accordance with the User Manual provided by Swifter Fans.
- 2.5 The fan cannot be modified in any way.
- 2.6 For fans installed in outdoor locations, the installation site must provide solid overhead protection from precipitation that extends a minimum of two (2) feet beyond the fan wingtips on all sides. This overhead coverage must be permanent and fixed in place.
- 2.7 The fan must be paid for in full as per the terms of sale.

3. WARRANTY EXCLUSIONS

The warranties set forth above will be void in their entirety under any of the following circumstances:

- 3.1 The fan is exported outside of the United States.
- 3.2 Damage is caused by:
 - a) Improper operation, use, handling, transportation, installation, or maintenance;
 - b) Unstable electrical power supply;

- c) Physical collision of an external object with the fan; or
- d) Indoor Applications: Extreme environmental conditions outside normal commercial building parameters for the geographic region where the fan is installed such as excessive heat, humidity, dust, chemical exposure, and corrosive or erosive environments. This exclusion applies only to fans installed in indoor locations.
- e) Covered Outdoor Applications: For fans installed in outdoor locations with proper overhead protection as specified in section 2.6, corrosion caused by salt water exposure or salt air as a result of installation in proximity to salt water bodies (including oceans, seas, bays, or other marine environments). This exclusion also includes damage from acid rain, chemical exposure, and other corrosive or erosive environmental conditions specific to outdoor installations.

3.3 Manufacturing defects that are visually apparent during unpacking and initial setup without the use of tools or operation of the fan are not reported to Swifter Fans within ninety (90) days of the ship date. This includes obvious damage to packaging, visible cracks, dents, missing components, or other defects that would be immediately noticeable to a person conducting a standard receiving inspection.

4. ITEMS NOT COVERED BY WARRANTY

The warranties set forth above do not cover:

- 4.1 Normal wear and tear, including gradual deterioration of components due to regular use over time, minor surface oxidation, slight noise increases after extended operation, and routine maintenance items as specified in the User Manual.
- 4.2 Minor cosmetic defects that do not affect performance, including small scratches, minor scuffs or marks that do not penetrate the base material, slight color variations within manufacturing tolerances, or other superficial blemishes that do not impact the structural integrity or operation of the fan.
- 4.3 Fan noise. Fan noise ratings stated on Swifter Fans product data sheets, quotations, or other communications are based on controlled test conditions and are therefore approximations and for general reference only. Actual fan noise may vary depending on installation site, fan configuration, environment, and duration of use. Fan noise is normal and is to be expected given the use of various electrical and mechanical sub-components.
